SUMMARY

Motivated B.Tech Computer Science student specializing in Cybersecurity with strong skills in Java and Python for full-stack development. Hands-on experience in building scalable applications with a solid understanding of backend, frontend, and security principles. Passionate about problem-solving and continuous learning, seeking to contribute effectively in a dynamic professional environment.

EDUCATION

Degree	Specialization	Institute	Year	Score
B.Tech	Computer Science and Engineering	KL University	2022-2026	8.93(CGPA)
Intermediate Institutions	Mathematics, Physics, Chemistry	Sasi Educational	2022	82%

PROJECTS

Indian Residential Property Platform

- React.js, SQL
- Built a full-stack platform with property listings, valuation insights, renovation tips, and buyer-seller matchmaking. Implemented secure login, analytics, and market trend predictions.

Online Bidding Platform

- Python, Django
- Developed a real-time auction system with bidding, scheduling, user auth, payment integration, and live notifications. Included dashboards and automated winner selection.

TECHNICAL SKILLS

- Languages: Python
- Core Concepts: Object Oriented Programming
- Databases: SQL
- Visualization Tools: Power BI
- Soft Skills: Communication, teamwork, problem solving, time management

CERTIFICATIONS

- AWS Cloud Practitioner
